

From the Desk of the editor

Acknowledging the Stakeholders, Series Two – ‘Salutation to Editors’

The challenges for ensuring quality publication in the digitally transformed era are rising. The difficult arena of Plagiarism contentment has new domains to address. The availability of the latest tools from the field of AI (Artificial Intelligence) has asked for increased vigil. There is no respite to the challenges of scientific publishing.

This makes the role of journal editors and publication houses a tough job. We at CIJMR (Central India Journal of Medical Research) and MRI (Medical Research and Innovation) Publishing, are committed to upholding the scientific vigour of our published work. The relentless effort of the journal editor and section editors along with the staff at MRI Publishing needs a special mention.

We are beholden to the efforts of senior editors like Dr. Sadanad Dwivedi, Dr. Megha Sharma, Dr. Sai Sailesh and editor Dr. Nitu Kumari. Their relentless contribution has been instrumental in navigating the rough weather.

The present issue covers diverse areas. The editorial on the need for an integrative approach to solving the health problems in modern society discusses its broad domain. Articles on Synaesthesia are an eye-opener. Cardiac MRI, a topic of new development in the field of radiodiagnosis is an interesting read. The research work on Comparison of Sensorineural Hearing Loss reveals important scientific observations. The review article titled ‘The Crucial Role of Understanding the Incubation Period in Immediate Patient Care’ touches upon the importance of this basic but forgotten concept. Our CME topic on ‘Biases including Confounding and Effect Size Modification in Clinical Studies and their Mitigations’ is a must-read for all researchers, both naïve and seasoned. The update on “Yoga in the Management of Parkinson’s Disease”, opens up the discussion on the significant role of integrative medicine in present-day patient care.

Thus, our commitment to the field of scientific publishing stays un-wavered.

Dr Badrinarayan Mishra
