

Multidomain medical journals face numerous challenges, especially in their early years, as they strive to meet both editorial and user expectations.

At CIJMR, our stakeholders have matured significantly over time. The ongoing contributions from the research community, combined with the unwavering support from our expanding panel of dedicated reviewers, have been crucial to our successful journey.

As of Volume 4, Issue 3, the journal has published a total of 98 items, of which 58 articles are authored by contributors outside our publishing institute. The top twenty contributors include Ruxmaniben Deepchand Gardi Medical College, Karolinska Institute (Sweden), the Government of India Ministry of Health and Family Welfare, All India Institute of Medical Sciences (New Delhi), Issue, All India Institute of Medical Sciences (Raipur), Devi Ahilya Vishwavidyalaya, Manipal Academy of Higher Education, Anhui Medical University (China), Mahatma Gandhi Memorial Medical College, All India Institute of Medical Sciences (Bhopal), Sri Sathya Sai Institute of Higher Medical Sciences, Datta Meghe Institute of Medical Sciences, Chirayu Medical College & Hospital, Indian Institute of Public Health (Gandhinagar), Manipal-Tata Medical College, Jamshedpur Institute of Medical Sciences, Banaras Hindu University, and Guangzhou Medical University (China). These contributions showcase our journal's potential and solidify its presence in the international arena.

Our dedicated efforts have received well-deserved recognition. In less than four years, we have achieved indexing in Index Copernicus International, Google Scholar, EMBASE, ROAD, CROSSREF, and OpenAlex.

Let's continue to support this valuable project!
